

Hemp Testing & Analysis

Licensed Hemp Testing

Hemp is a high value crop requiring careful and intense management. It is vitally important that the crop be monitored for Total THC levels during the growing season. This information is necessary for harvest planning.

MVTL is licensed under the Minnesota Department of Agriculture's Hemp Pilot Program to provide analytical services to Hemp Growers, Processors and Producers of Hemp Products.

MVTL offers fast and accurate analyses of plant material as well as oils, drops and creams.

MVTL hemp analytical services include:

- Cannabinoid Profile
- THC Content
- Microbiological Contaminants
- Heavy Metals

Additional Agricultural Testing Services

- Basal Stalk Nitrate
- Distiller's Grain
- Feeds/Forage/PetFood
- Soil Fertility
- Manure
- Nematode
- Pesticide Residue
- Plant Tissue
